

Step by Step LMS Onboarding

What is a Learning Management System (LMS)?

A Learning Management System (LMS) is a platform designed to facilitate the administration, documentation, tracking, and delivery of educational content and training programs. It serves as a central hub for organizing and managing various aspects of learning and training activities.

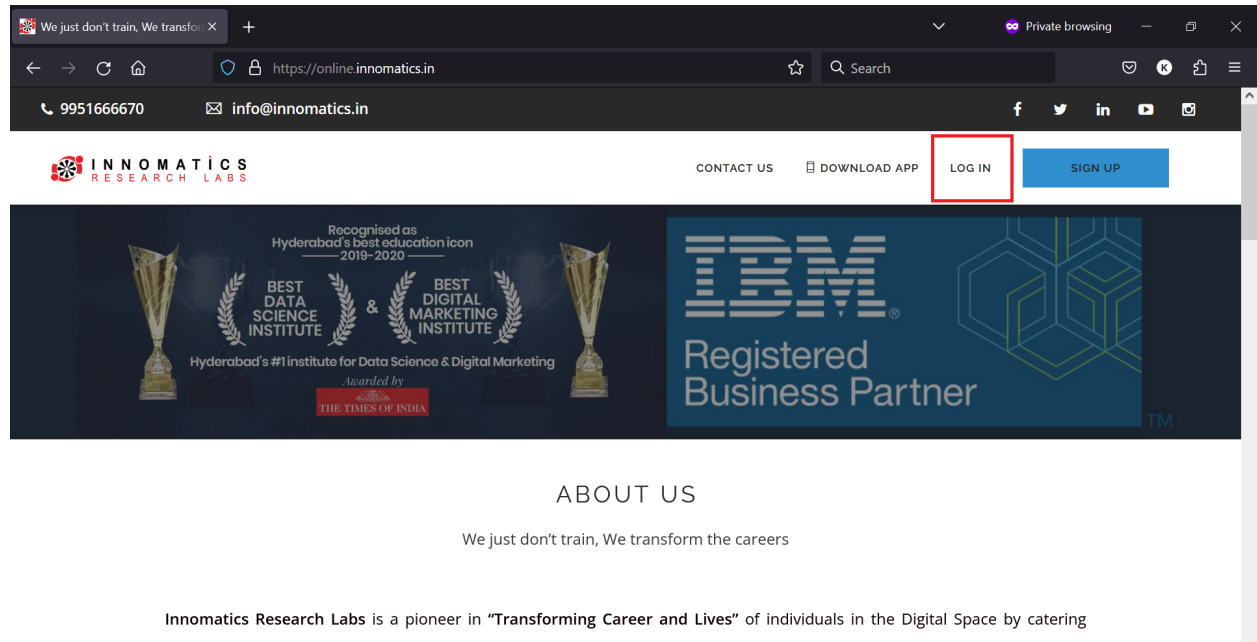

Note that

1. Access to the LMS portal is valid for 6 months from the time of start of the training program.
2. E books (PDFs), study materials, code examples and other training material can be accessed on the portal for 6 months.
3. All downloaded materials are proprietary and confidential assets of Innomatics and cannot be reproduced, copied or shared with others and cannot be used for any commercial purposes.
